**Sealed Air Corporation B2B (Magento 2)**

**Role:** Junior Developer

**Tool:** PHP – Magento2 (Enterprise 2.4.6), MySQL, GIT, Newrelic, Fullstory, ServiceNow

Team Size: 14 members

**Project Description:**

Sealed Air is an ecommerce platform in which packaging products are sold. The main data source for the platform comes from SAP through Azure in the form of API calls. The website supports multiple country languages like US, UK, Germany, Spain, France, Italy. ElasticSearch is used as a search engine in Sealed Air where customers can search for products which they are looking for. Some the pages in website are dependent on Azure for the data and these data is fetched using API calls when user navigates to those pages.

**Responsibilities:**

- Worked on bug fixing.
- Finding Newrelic issue and providing the root cause.
- Monitoring API calls and communicating with Azure and SAP team is any failures.
- Worked on resolving ServiceNow incidents.
- Production monitoring and daily reporting to clients.
